Hi [REDACTED]

Please find attached the spreadsheet of instances we've identified on the various platforms.

Where there has been a number of 16-17 year old instances, this is where we *know* that this person is a child, rather than an adult. Usually we wouldn't take action on this sort of imagery as we cannot usually be sure that the person is a child – we can't take action on imagery where there's a chance the person pictured could be an adult.

I hope you find this useful.

PS, if I find out that the Telegraph are publishing tomorrow, we'll also be putting the stats up on our website for various social media/search/video platforms. They're all household names.

Best wishes,

[REDACTED]
